Team

Hyun Suk LEE | Founder & CEO

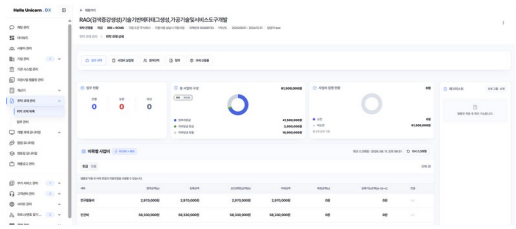

- Research administration and startup operations experience since 2018.
- Expertise in IT service planning, UX/UI design, and public–private project management.
- Drives GovTech development, institutional partnerships, and cross-border startup collaboration.

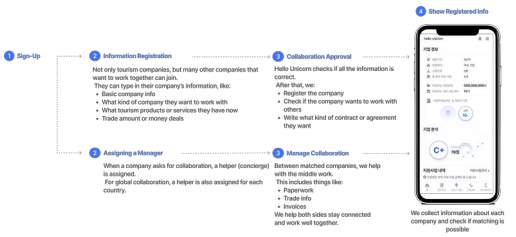

Chaegyeom SONG | CTO

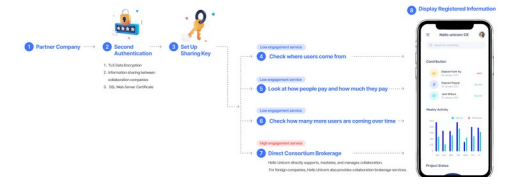

- Leads service engineering, core data-asset architecture, and algorithmic design

Doyoung KIM | PM, Research Admin & Data

- Oversees research-admin operations, data collection, labeling, and workflow structuring

Problem

- **Administrative Overload:** Grant execution, documentation, settlement reports, and audits drain excessive hours away from SME founders.
- **Rapid Regulatory Changes:** Labor, tax, and R&D compliance rules shift faster than lean startup teams can track
- **Late-Surfacing Risk:** Grant deadlines, loan repayments, and fixed overhead collide, exposing cash shortages when it is already too late.

Solution

- **AI-Powered SME Decision Engine:** Hello Unicorn converts structured grant and R&D workflows into automated AI routines for proactive management.
- **Predictive Risk & Compliance Validation:** Continuously evaluates runway, audits payroll allocations across projects, and triggers early mitigation warnings.

Key Features

- **Stability Analysis & Runway Forecaster:** Real-time visibility into cash runway, stability grades, and action-oriented cash shortfall alerts.
- **Automated Payroll & Compliance Checker:** Pre-submission audits flagging overlapping project participation, over-allocation, and changing regulatory traps.
- **Institutional SGMS Console:** Centralized console for government agencies to oversee program budgets, track settlements, and review risk queues.

Business Model

- **B2B Managed & SaaS Admin:** ~~₩~~450K–~~₩~~800K (~US$320–$570) monthly per SME for managed admin, complemented by B2B add-on services.
- **B2G & Institutional Licensing:** Deployment of SGMS platform, Stability APIs, and Growth Navigator tools for enterprise and public agencies.

Business Snapshot

- **Cumulative Revenue:** ~~₩~~2.5B (~US$1.8M) accumulated from 2023 to August 2026, remaining profitable/break-even annually.
- **User Base & Retention:** 14,840 total sign-ups to date; 98% 3-month renewal rate; 72% re-entrust rate for subsequent grant cycles.
- **Government Validation (PoC):** Active risk-prediction PoC with KOSME (Korea SMEs and Startups Agency) under NIPA GovTech 2026.
- **Patents & Awards:** Patented AI-driven business management plan generation (KR 10-2831092); Excellence Awards from KOSME and NIPA.

Seeking Opportunities

- **Public Agency & GovTech Partners:** Co-designing pilot PoCs using SGMS or the Stability API with Singapore public agencies.
- **SME-Serving Ecosystem Partners:** Collaborating with banks, lenders, accounting/corporate secretarial firms and SME associations.
- **Investor Network:** Engaging with regional investors ahead of/during the ongoing Pre-A bridge round (target KRW 450M).
