Team

Kyungjin KIM
Founder & CEO
Korean Certified Public Accountant

- Deloitte Anjin — grant-fund audit & tax
- Built in-house tax software
- Shinhan Securities, IPO team

AI Lead
Multimodal post-training at LG AI Research · CVPR 2026

Dev Lead
Full-stack engineer, 12 years · multiple AI hackathon awards

5	3	3
Domain	**AI**	**Dev**
criteria · answers · review	training · evaluation · judgment	product · integration · supply

CPAs write the rules, the AI team builds the judgment — every day, on one team.

Target Audience

Grant-claim auditors | Accounting firms | Programme operators | Credit & company-data providers | SI / cloud partners | SME finance teams

Live product (Korean UI): company dashboard auto-built from budget, tax invoices and cards; a gray-zone judgment with the facts to confirm and cited rules.

Problem

- **Slow.** An accounting-firm review reply takes 1–2 months, so a project gets only about two review cycles.
- **Every programme differs.** 22,000 programme calls, each with its own rules; one cost line alone can need 10–19 documents.
- **Mistakes cost money.** Rejected spend is clawed back. In Singapore, EDG claims are paid only after outcome and audit checks; schemes merged into EDGE on 30 Sep.
- **The only fix today is more people** — agencies and audit firms grow headcount with every new company and programme.

Solution

- **Company memory (ESM):** finance, budget, transactions and evidence kept as one model — company × project × transaction × time.
- **Rule judgment:** "Can we spend this?" answered with the cited clause; in a gray zone it asks for the one fact that decides it.
- **Documents & approval:** finds missing evidence, fills forms with company data, routes to the authority and records the result.

Key Features

general AI stops at an answer — Lumos runs all 7 steps

#1 on rule citation
Same base model, 0.000 → 0.648 with Lumos training and version-aware retrieval — #1 of 14 setups.

#1 on document extraction
Admin-document score 0.757, #1 of 5 models; fills original HWPX forms as-is.

Self-improving agent
Learns daily from real work and expert feedback, then self-plays generated cases overnight.

New programme in 1 week
Onboarding cut from 3 months to 1 week; Day 0 target by end-2026. Outside actions only after user approval.

Business Model

- **Agencies:** supply, build and operate contracts — one contract brings hundreds of portfolio companies.
- **Usage fees:** KRW 0.4–1.2M (≈USD 280–850) per company per month; accounting firms on per-engagement review contracts.
- **Grant-spend marketplace:** commission when a matched supplier deal closes.

Business Snapshot

REVENUE	VOLUNTARY ADOPTION	AGENCY RENEWAL	RESOLUTION TIME
KRW 554M	**83.3%**	**318 → 450**	**3 days**
FY2025 (+132%) · FY2026E KRW 1.0B	265 of 318 LIPS SMEs, not mandatory	SEMAS LIPS → LIPS2 scope	median, from 1–2 months · 0 clawbacks

- KRW 8.85B of grant spend processed; 1,414 work requests; 8,147 end-to-end task records as training data.
- **Partners:** KODIT BASA two-way API (~560K SMEs) · NICE BizINFO embedded + joint R&D · KODATA PoC · NIPA GovTech · TIPA & KEIT data.
- 2 patents filed · Microsoft × AroundX (Majung) track · raising Pre-A KRW 500M at KRW 7.0B pre-money.

Seeking Opportunities

Singapore visits: 26–29 Oct & 1–5 Nov 2026

- **One paid pilot** where grant claims and accounting evidence review overlap — contract in Oct, ~4-week build & validation in Nov with a dedicated team.
- **Partners:** claim audit teams, programme operators, accounting reviewers, company-data providers and MS partners with a real client.
- **Investors** for the Pre-A round with an ASEAN B2B or GovTech focus.
