Team

Jihee Jung | Founder & CEO

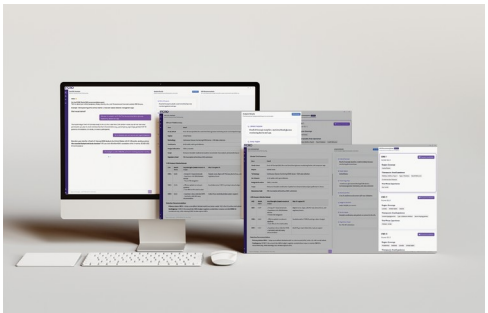

- Pharmacist with a master's degree in pharmaceutical industry
- 6+ years of MR/MSL experience at Roche Korea, Mundipharma Korea, and Bayer Korea
- Expertise in pharmaceutical business and clinical trial intelligence

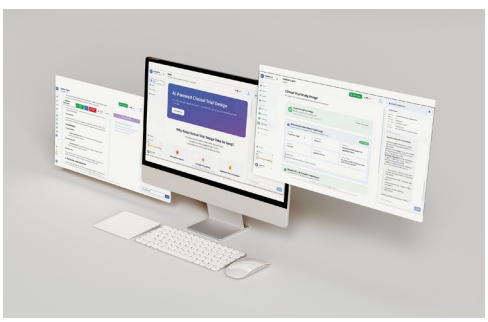

NamGoo Song | CDPO

- Machine learning and data extraction expert
- Leads AI analytics and platform development

Nayeon Ryoo | Director

- PhD in biotechnology
- Research expertise in functional genomics and drug development
- Clinical trial data analysis and research expertise

Problem

- Fragmented clinical trial and regulatory information across countries makes data collection and comparative analysis time-consuming.
- Network-dependent CRO searches limit access to comparable capability data and delay suitable partner selection.
- Limited specialist resources and budgets increase clinical trial preparation burdens for emerging drug developers and medical device companies.

Solution

- MediC: Integrates global clinical trial data to analyze comparable studies, competing drugs, trial designs, and regulatory guidelines.
- FiCRO: Matches sponsor requirements with CRO capabilities using AI to identify suitable clinical trial partners worldwide.
- Connects information analysis with partner selection, reducing the time and workload required for clinical trial preparatio

Key Features

- Search and analytics supported by 770,000+ global clinical trial records and 29,700+ CRO profiles.
- AI-powered CRO recommendations using 20+ criteria, including therapeutic expertise, geography, development stage, and execution history..

Business Model

- MediC: B2B licensing for clinical trial data analytics serving pharmaceutical, biotech, medical device companies, and research institutions.
- FiCRO: Per-RFP fees for digital CRO discovery and matching services.

Business Snapshot

- 2025 Revenue: Approx. USD 1.37M, 4.7× growth since 2023
- Total Funding Raised: Approx. USD 1.5M
- Global Network: 230+ partners
- Awards: IFA Best in Tech for Good winner; Edison Awards & WSA nominee

Seeking Opportunities

- Pilot projects with Singapore pharma, biotech, and medtech companies.
- CRO partnerships for Southeast Asian expansion.
- Investor connections for AI development and regional growth.
