Team

Jihun LEE | Founder & CEO

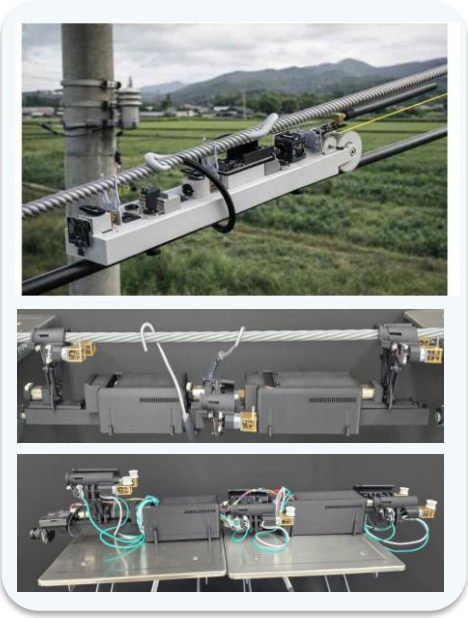

- 20 years of software and robotics development experience.
- Leads international partnerships, pilot strategy and commercialization.

Junhyuk PARK | AI & Global BD

- Works on robotic vision and object-detection AI.
- Supports global buyer meetings and on-site PoC demonstrations.

In-house R&D Team

- Five R&D staff; integrated robotics hardware, navigation and edge AI.

ACRL (Autonomous Cable-Routing Line-bot)

Market Entry / Target Users

- Singapore: develop ACRL-U for underground ducts and cable tunnels.
- ASEAN: deploy overhead-line ACRL with utilities, telecoms and contractors.

Problem

- Utility cable installation relies on repeated aerial lift positioning and hazardous work near live power lines.
- Manual routing increases labor hours, traffic interruptions, safety risks and project delays.

Solution

- ACRL rides existing messenger wires and cables, automatically laying a guide line for new installations.
- Ground-level operators supervise progress remotely, reducing the need for elevated manual work.

Key Features

- On-device vision AI recognizes cable hangers and obstacles, including in weak-connectivity locations.
- Variable arm and clamping wheels pass narrow hanger sections while stabilizing line contact.
- Guide-line reel, tension sensing and operator app support controlled routing and alerts.

Business Model

- Hardware sales to public utilities, telecom operators and infrastructure contractors.
- RaaS subscription, maintenance and deployment support for lower upfront costs.
- Field-operation data and AI-based maintenance reporting services.

Business Snapshot

- 2025 revenue: KRW 1.193B (2023: KRW 384M; 2024: KRW 684M).
- KRW 300M seed investment; 3 registered and 5 pending patents.
- Industrial work with Kia / Hyundai Motor Group and HD Hyundai Samho.
- 2026 KEPCO GovTech field validation in progress; 10-span pilot target.

2026 FIELD-TRIAL TARGETS

95%	90%	50%	80%
Hanger pass	Span routing	Faster work	Less lift use

Seeking Opportunities

Singapore PoC and ACRL-U co-development partners; ASEAN distributors.
